PROFILE SUMMARY

Full-stack Developer with 4+ years' experience building high-performance web and mobile apps using Next.js, React Native, and Node.js. Skilled in designing scalable architectures, optimizing performance, and delivering user-centric, production-ready systems with clean code and modern DevOps workflows.

SKILLS

Frontend: Next.js | React Native | TypeScript | Tailwind CSS | Zustand| Expo | Tanstack Query
Backend: Node.js | Nest.js | Express.js | MongoDB | PostgreSQL | Supabase | RESTful APIs | JWT | Socket.io | drizzle
DevOps & Tools: Git | GitHub | Docker | Vercel | Render
Others: UI/UX Implementation | API Integration | State Management | Cross-Platform Optimization | Scaleable Development

WORK EXPERIENCE

Software Engineer | VigoRide   **Jan 2025 – Oct 2025**

- Engineered critical features such as instant booking, live tracking, and secure payment integration, improving transaction reliability by 35%.
- Enhanced system performance and frontend responsiveness across mobile and web, supporting 10K+ daily active users with real-time updates.
- Implemented state management and Socket-based communication for seamless data synchronization between riders and customers.
- Collaborated with backend to deliver high-impact releases, improving development velocity by 25%.
- Strengthened overall user experience through performance profiling and caching strategies.

Frontend Developer | KeenzChillz Properties   **Feb 2024 – Aug 2024**

- Developed and maintained dynamic booking flows, interactive listings, and dashboard modules using Next.js and TypeScript, enhancing booking success rates by 20%.
- Optimized page performance and load times, reducing Time-to-Interactive (TTI) by 35%
- Partnered with UI/UX designers to translate wireframes into production-ready interfaces.
- Introduced component reusability standards and modular architecture, cutting new feature delivery time by 30%.

EDUCATION

Lagos State University, Ojo, Lagos State
Bachelor of Science in Computer Science

PROJECTS

VigoRide - Logistics & Delivery Platform
Built and optimized real-time booking, tracking, and payment systems using ReactNative and Expo, powering thousands of daily deliveries. Enhanced platform reliability, responsiveness, and live updates across platforms.

KeenzChillz - Short-Let & Property Rental Platform
Developed responsive property listing and booking interfaces with seamless user experience.
Improved site performance and accessibility, boosting user engagement.

Campus Voice – Complaint Management System
Created a secure complaint management system with role-based permissions and routing logic.
Enabled transparent issue tracking and multi-level resolution for academic institutions.

CERTIFICATIONS

React Native Mobile Development – HNG Internship, 2025 | Fullstack Web Development - Frontend Masters, 2024 | Backend and DevOps - LASRRA Internship, 2024
